Todd, I received a couple of comments regarding the interim/early action process and the 9 criteria. I was initially planning to keep it focused on the primary differences (comparison slide). What are your thoughts on these additional slides? Too much? Too little?

New Slide 14—describe the interim/early action process

New Slide 17—identify the 9 criteria

Potential revision of slide 18—put in the attached table?

Criteria	Alternative 2: Excavation, Treatment, Offsite Disposal	Alternative 3: Excavation, Treatment, Consolidation, Onsite Disposal
overall protection of human health and the environment	X	X
compliance with applicable or relevant and appropriate requirements (ARARs)	X	X
long-term effectiveness and permanence	Sources Removed/Lead Treated/Offsite Disposal	Sources Consolidated/Lead Treated/Onsite Disposal
	No operations and maintenance/monitoring	Operations and Maintenance/Monitoring
	Limited/temporary restrictions	Permanent Restrictions
	five-year review	five-year review
reduction of toxicity, mobility or volume through treatment	Sources Removed/Lead Treated/Offsite Disposal	Sources Consolidated/Lead Treated/Onsite Disposal
short-term effectiveness	4 months	6 months
	Excavation Dust	Excavation Dust
	Truck Traffic	Truck Traffic
		Slightly longer exposure time
implementability	easily implemented/standard construction practices	some specialized knowledge for cap installation/standard construction practices
cost	\$4,135,294	\$4,633,269
State Acceptance	state supports this alternative	
Community Acceptance	based on review and comment	based on review and comment
